Ruger built the Precision Gen 3 Bolt-Action Rifle from the ground-up, specifically for long-range, tactical shooting. Comes with a new, free-float M-LOK® handguard that provides greater clearance with large-diameter objective lens. The bolt has three lock lugs, resulting in superior strength and a 70° throw. The Precision MSR buttstock attaches to an AR-style buffer tube on a left-folding hinge, and the stock adjusts for length of pull and comb height. The buttstock features QD sling attachment points, a bottom Picatinny rail and rubber butt pad. The cold-hammer-forged 4140 chromoly steel, medium-contour barrel has 5R rifling. The barrel nut enables close tolerance headspacing, and a Marksman Adjustable™ Trigger breaks clean to enhance accuracy.

Phoenix Weaponry has provided one of their top selling suppressors featuring tremendous sound suppression and felt recoil reduction on firearms for a much better shooting experience. Suppressors will require an additional \$200 tax stamp payable to the BATFE. Application paperwork, passport size photos and fingerprints can be completed at Phoenix Weaponry and are performed free of charge.

Burris Optics tops off this rifle with the Burris RT-25 5-25X56mm scope which allows target shooters and hunters the same finely tuned precision. This size is perfect for any long range hunting adventure. It also doubles very successfully in long range precision shooting.

\$20 per ticket or 6 tickets for \$100

Winner to be drawn at Outdoor Buddies Clay Shoot at Colorado Clays in Brighton CO, on August 7, 2021. Do not need to be present to win.
